RAW MATERIALS

Certest Raw Materials provides high quality solutions for developing and manufacturing your IVD assays.

Our expertise in **protein expresion & purification, monoclonal antibodies development & manufacturing and primers & probes manufacturing** offer to our customers a priceless support in their challenging proyects.

All our products have been properly characterized in our internal platforms and IVD products, helping us to provide our customer some useful advices about their use and performance.

Additionally, we also offer to **third parties manufacturing** and **R&D services** for the production or the development of your own materials carried out by our high qualified staff in a competitive time.

certest
IMMUNODIAGNOSTIC

Certest Immunodiagnostic is committed to providing a comprehensive portfolio of diagnostic reagents for detecting infectious diseases and different markers, covering different needs of formats, types of use, throughput, precision, and time from sample to result.

- **IMMUNOCHROMATOGRAPHY** provides rapid test solutions for aiding the professional of diagnostic with an immediate solution, needing no equipment, and having results usually in less than 15 minutes.
- **TURBIDIMETRY** provides diagnostics solutions for automated and quantitative results and higher throughputs.
- **CLIA** provides a quantitative, high sensitivity, automated diagnostic solution based on the chemiluminescent amplification of an immunocapture.

VIASURE by certest

VIASURE offers a reliable molecular diagnostic solution, from sample to interpretation of results, covering a wide range portfolio of products and enabling laboratories to better inform clinical decisions.

Nowadays infectious diseases are one of the greatest challenges for public health, hence the primary goal of VIASURE/CERTEST is to bring suitable and optimized tools for a reliable detection as well as differentiation of infectious pathogens through the analysis of nucleic acids. An innovative and comprehensive VIASURE solution enables the processing of multiple molecular diagnostic assays in a standardised workflow.

Extraction kit
Quick and Automate RNA/ DNA extraction kits.

V-Flex
All-in-one platform that allows Nucleic acid extraction and PCR set-up.

Real Time PCR Detection kits
Lyophilized product. Ready & Easy-to-use.

V-Lab96
Run your Real Time PCR.

V-Smart
Automatic result interpretation.

certest PHARMA

The objective of Certest Pharma is to contribute with its technology to obtain better therapeutic products based on RNA.

It is focused on three main areas:

RNAs

The design and synthesis of RNAs.

DELIVERY

Obtaining new lyophilized formulations based on Lipid Nanoparticles (LNPs) and developing new proprietary ionizable lipids.

CERTEST VACCINES

The development of new RNA vaccines, including a project for an inhaled vaccine against Tuberculosis.

All these assets are available to its collaborators and clients so that **together we can help to improve global health.**
