VIASURE
Real Time PCR Detection Kits

Lyophilised kits

One assay.
Multiple pathogens detection

Molecular Diagnostics

VIASURE® Real Time PCR Detection Kits are designed for the diagnosis of infectious diseases caused by different pathogens in human samples.

This product range is based on 5' nuclease chemistry. This technology utilizes two primers and a hydrolysis probe and exploits the exonuclease activity of Taq DNA polymerase.

During the amplification, the increase in the fluorescent signal is proportional to the quantity of target sequence present in the sample and could be measured on a wide range of Real Time PCR platforms.

VIASURE® Real Time PCR Detection Kit contains in each well all the necessary components for Real Time PCR assay in a stabilized format, which allows the shipment at room temperature.

Monoplex and Multiplex kits provide maximum flexibility and compatibility with leading open system thermal cyclers.

Work Flow

1

Add 15 μ l of rehydration buffer into each well (*).

(*) It is recommended to include one positive and negative control in each run.

2

Add 5 μ l of: DNA/RNA sample // or Positive control // or Negative control.

3

Load the strips into the thermocycler and run the specified protocol.

4

Interpretate results.

VIASURE Hyperplex

Real Time PCR multiplexing panel kits detecting simultaneously viruses, bacteria or parasites.

Simultaneous detection of multiple targets in a broad range of multiplexing diagnostic panels. Flexible choice of target pathogen based for effective patient care and cost-effectiveness.

Each panel is dedicated to a specific area of pathology.

Example for respiratory panel disposition.

▶▶ Gastrointestinal panel I ⁽¹⁾

Ref. GP01

- *Salmonella, Campylobacter & Y. enterocolitica*
- *Shigella*/EIEC
- *Cryptosporidium, Giardia & E. histolytica*

⁽²⁾ No detection in Cy5 channel.

⁽³⁾ The product should be reconstituted following the appropriate procedure and transferred into specific SmartCyclers® tubes.

Compatibilities for monoplex VIASURE Kits.
For multiplex kits compatibility, see instructions for use.

VIASURE

Real Time PCR Detection Kits

Benefits & Advantages

Lyophilised product.
Forget about the cold chain

Same thermal protocol for all our kits.
Create your own panel

"Ready & Easy-to-use" kits

Long term stability.
Transport and storage at room temperature

Shelf-life: 24 months
(for all our qPCR products)

From 1 **up to 96 samples** per assay

High sensibility, specificity and reproducibility

Validated according to **ISO 13485**
and **CE marked**

The Real Time Polymerase Chain Reaction has been turned into one of the most powerful in vitro diagnostic tools for the detection and quantification of DNA or RNA.
