

# VIASURE Viral Zika Total Positive Control

Ref. VS-VP1ZIKRUO

▶▶ **VIASURE Viral Zika Total Positive Control** is intended for monitoring the whole real-time PCR (RT-qPCR) process, from nucleic acid extraction to reverse transcription and amplification steps.

▶ Inactivated viral particles. Non-infectious & Non replicatives.

▶ **Lyophilized** presentation: transport and store at room temperature with a shelf life of **24 months**.

▶ **Monodose** format for nucleic acid detection techniques.

▶ Final concentration range quantified by digital PCR: **11,000-110,000 copies per vial**.

▶ **It contains the complete genome of the virus.**

▶▶ How does **VIASURE Viral Zika Total Positive Control** help in your lab process?

- Monitor instrument performance.
- Improve the analysis process: nucleic acid extraction, amplification, and detection quality.
- Allows you to obtain comparable results between different assays and platforms.
- Validate and verify different assays complying with regulatory requirements.

▶▶ **Test procedure:**

Reconstitution of the viral Positive Control

Nucleic acid extraction

Amplification

Result interpretation

▶▶ **Reagents provided:**

Reagent/Material	Description	Amount
<b>Viral Zika Total Positive Control</b>	Non-infectious lyophilized viral particle	4/1 vials
<b>Viral Rehydration Buffer</b>	Solution to reconstitute the lyophilized product	1 vial x 1mL
<b>Viral Negative Control</b>	Non template control	4 vials x 1mL

For more information and use procedure, read the instructions for use included in this product.
